

Columbus V-2000 Config Toolkit

Windows Installation Note

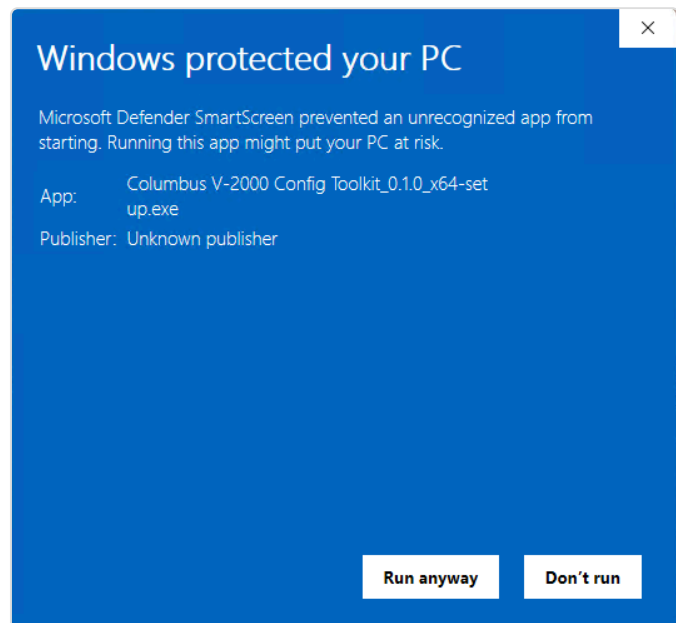

If Windows shows **Windows protected your PC** when you open Columbus V-2000 Config Toolkit_0.1.0_x64-setup.exe, that is normal for this unsigned installer — the download is fine.

1. On the blue screen, click **More info**.
2. Click **Run anyway**.
3. Continue through the installer.

You only need to do this once when starting the setup.

1 — Click More info

2 — Click Run anyway
